Test your knowledge and understanding

This page is designed to help you to test your own understanding of the concepts covered in this issue, and to reflect on what you have learnt.

We hope that you will also discuss the questions with your colleagues and other members of the eye care team, perhaps in a journal club. To complete the activities online – and get instant feedback – please visit www.cehjournal.org

Tick ALL that are TRUE

Question 1
Consider clinic layout, triage, patient flow and basic safety when there are many people with COVID-19 in the area or country. Which statements are TRUE?

- a. The number of consultations should be reduced to allow a distance of 1–2 metres between patients in waiting areas
- b. It is important that all patients who come to an eye unit get a full clinical assessment
- c. Investigations such as visual field assessment and OCT scans should only be performed when considered highly important
- d. Routine, non-urgent work should be postponed or deferred
- e. Checking the temperature of patients on arrival to a unit may help to identify patients with COVID-19

Question 2
Consider personal protective equipment and hand washing. Which statements are TRUE?

- a. PPE removes all risk of SARS-CoV-2 infection
- b. Putting on and taking off PPE correctly is as important as which type of PPE is used
- c. Using hand sanitiser or hand rub can replace hand washing in hospital
- d. Proper use of PPE removes the need to use hand rub or wash hands
- e. Facial hair, such as beards may need to be removed to get a good seal when using a filtering face piece respirator mask (FFP mask)

Question 3
People with disabilities require extra care and support during the pandemic. Which statements are TRUE?

- a. One of the main reasons why people with disabilities develop mental health problems is the stigma, discrimination and social exclusion they experience from people around them
- b. Face masks may intimidate some patients and impede communication, so an extra effort may be needed to be made
- c. If patients with disabilities have difficulty keeping to COVID-19 guidance then they should not be seen, even if they present with an emergency eye condition
- d. Most people who become infected with SARS-CoV-2 are symptomatic and many become severely ill
- e. Some people with cognitive disabilities cannot avoid touching their eyes

Question 4
Which statements are TRUE?

- a. The excess mortality refers to the increased number of deaths from COVID-19
- b. Eye care workers need to consider their own mental health during what may be a very stressful situation
- c. Testing everyone admitted to hospital for COVID-19 is a useful way of finding out how many people in the country are infected
- d. Most people who become infected with SARS-CoV-2 are symptomatic and many become severely ill
- e. When there are many people infected with the SARS-CoV-2 virus, it is important to close all eye care services to stop the spread of infection
